

Advantage Physical Therapy

Over the past decade managed care has drastically changed the way physical therapy services are rendered. As reimbursement declines and insurers assume more control over the utilization of our services, many clinics have been forced to increase productivity demands on their physical therapists. To meet these demands physical therapists are delegating more and more patient care to less qualified ancillary personnel. This means that your patients are not receiving the one-on-one care with a licensed physical therapist that is necessary to achieve optimum treatment outcomes.

At Advantage Physical Therapy we strive to defy this trend. In our office your patients will receive one-on-one treatment by a licensed therapist. Our staff believes that we have a moral and professional obligation to assure each patient receives the highest level of care possible and we are committed to doing just that. We do not allow managed care to influence the delivery of our services or our treatment philosophy and we pride ourselves on providing the personable care that has been lost in today's healthcare system.

Advantage Physical Therapy is now in its ninth year of business. The clinic was founded on the principles of making each patient a priority and providing the highest level of care possible. We accomplish this with a veteran staff, made up of physical therapists with a minimum of 6 years experience, and by guaranteeing each patient receives the one-on-one care they deserve.

We are dedicated to providing the one-on-one, personable care that has been lost in today's healthcare system.
