

**TREATMENT
PHILOSOPHY**

Our staff believes that quality care can only be achieved if the time is taken to provide it. We will take the time to listen to your patients, thoroughly assess them and develop a treatment plan that will address their individual needs. We will also take the time to educate your patients about their condition and what they can expect from treatment. But most importantly, we will take the time to provide the one-on-one, hands on care that is fundamental in achieving treatment goals. At Advantage Physical Therapy we simply take the time to care.

What Our Patients Have to Say About Advantage Physical Therapy

Advantage Physical Therapy is unique in that no physical therapy aids or techs are utilized in the delivery of our services. Therefore, you can be confident that your patients will receive one-on-one care by a licensed therapist during each and every treatment session. And with a minimum of six years experience, our therapists have the knowledge and treatment experience necessary to assure optimal treatment outcomes.

“As a physician I had referred patients to physical therapy, but never had to utilize their services myself until a knee surgery in 2003. I saw a therapist for an initial evaluation during my first visit and thereafter my care was supervised by a physical therapy aide, who was also supervising several other patients at the same time. Talking to other people who had gone through physical therapy, this seemed to be the norm; minimal personal attention after the first visit.

After a shoulder injury, I visited Advantage Physical Therapy. Much to my surprise, not only was my initial evaluation performed by a knowledgeable therapist, but all my subsequent visits for therapy were one-on-one sessions. The therapist was always present to instruct and advise as needed. With subsequent knee surgeries I have continued to do my rehabilitation at Advantage Physical Therapy, and each experience has involved the same level of personalized attention.

Having undergone several bouts of treatment over the past three years at Advantage Physical Therapy I have seen that other patients, no matter their injury, receive the same level of care and hands-on attention that I have. I recommend Advantage Physical Therapy to all my patients, and will continue to use them in the future for my own physical therapy needs.”
